

# Innovian® Anesthesia Reporting Tool

Innovian® Anesthesia data to reports.  
 Reports to knowledge.  
 Knowledge to improved patient outcomes.

Meet the Innovian® Anesthesia Reporting Tool.

MT-1831-2008

## IMPROVE OUTCOMES AND EFFICIENCIES

The Innovian® Anesthesia Reporting Tool, Dräger's flexible reporting process solution, can provide powerful, actionable insight through detailed reports to effectively improve patient care, operational efficiencies, and clinical outcomes in the operating room.

## EASY ACCESS TO PATIENT DATA

The Innovian® Anesthesia Reporting Tool allows users who have a basic knowledge of off-the-shelf reporting applications and are familiar with the configurations of their Innovian® Anesthesia lists to quickly and easily generate retrospective reports through a "ClickOnce" Windows forms application.

Near real-time, user-defined reports help decision-makers validate the effectiveness of current anesthesia practices and provide the means to track and measure quality outcomes, regulatory compliance, time and resource utilization, and other performance indicators.

## GETTING CRITICAL INFORMATION WHEN AND HOW YOU WANT IT

Reports ranging in type and detail level can be built, published, scheduled, shared, and emailed according to individual and department needs.

Data Models, or point-and-click, Dräger-configured information categories, simplify the report building process by making it easy to find and include the necessary patient and process information in each report.

The Data Models in the Innovian® Anesthesia Reporting Tool include:

- Medication
- Vitals
- Lab
- Quality
- Billing
- Utilization

To enhance visibility of trends and patterns, reports can be formatted as tables, matrices, or graphs – and saved to be viewed as needed. For added versatility, the reporting tool allows for collected data to be exported and viewed using 3rd party software.

## THE DRÄGERSERVICE® VALUE ADD

We understand every healthcare facility faces unique, constantly evolving clinical and financial challenges. To make it even easier to keep step with the challenges of today and tomorrow, DrägerService® can build the reports decision-makers care about how & when they're needed.

**CLINICAL APPLICATIONS OF THE INNOVIAN® ANESTHESIA REPORTING TOOL**

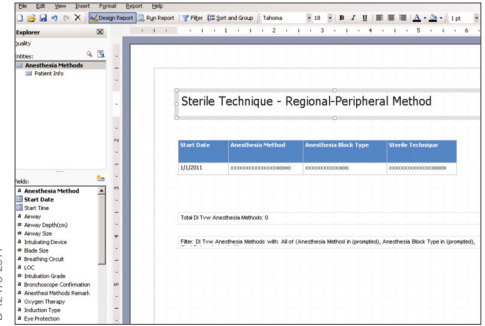

The Innovian® Anesthesia Reporting Tool can provide insight to improve the quality of patient care and patient satisfaction through key performance indicators, such as:

- timing and documentation of preoperative prophylactic antibiotic administration;
- adherence to central venous catheter insertion protocols;
- glucose control in diabetic patients;
- patient body temperature on arrival in PACU; and
- postoperative nausea and vomiting.

**FINANCIAL BENEFITS OF THE INNOVIAN® ANESTHESIA REPORTING TOOL**

Data extracted using the Innovian® Anesthesia Reporting Tool can also provide quantifiable insight to drive optimal financial performance, for example:

- consumption of anesthesia-related drugs to control costs;
- resource utilization and productivity to evaluate, manage, and improve operational efficiencies and patient throughput; and
- adherence to CMS and PQRI measures to realize better pay-for-performance benefits.

D-12475-2011

**THE INNOVIAN® ANESTHESIA REPORTING TOOL PART OF DRÄGER'S COMPLETE ANESTHESIA SOLUTION**

The Innovian® Anesthesia Reporting Tool is only a piece of the complete anesthesia solution Dräger has to offer. Dräger's anesthesia workstations provide precision ventilation performance, patient monitoring, volatile gas analysis, automated patient charting, and convenient networkability.

As your practice grows, Dräger can grow with you.
