

Dräger

Rental Professional

Dräger

Technology for Life

Running a safe operation relies on having the right gas detection equipment on hand and ready to use. This can be a challenge to your operations and budget as equipment can be expensive and often requires specialty maintenance. Not to mention added costs when critical equipment becomes damaged or lost. During peak activity time, you may find that you are in short supply of essential safety equipment needed to stay on schedule.

Before purchasing more inventory, consider the benefits of renting from Dräger.

- Access to the right equipment as needed
- Fewer inspections, maintenance, and repair bottlenecks
- Increased productivity
- Reduced downtime
- Potential for cost savings
- Transparency

Dräger Rental Professional

Outsource to a trusted source

As a manufacturer of high-quality safety equipment, we are prepared to deliver a comprehensive gas detection rental solution that meets your specific needs. You can save on the initial capital investment, and the ongoing ownership costs of maintenance, repairs and equipment management. We strive to ensure the equipment is delivered on-time and ready for use!

Dräger's Rental Professional includes our highest level of service and helps support your daily operations with a streamlined, full service equipment rental and maintenance solution. This solution is customizable, flexible and scalable based on your specific needs.

Advantages of Dräger Rental Professional program

- ✓ Access to the latest advanced technology and software solutions.
- ✓ Helps to enhance budget efficiency and predictability with a fixed price solution that includes rental, maintenance, sensor replacement and a Dräger proprietary Microsoft Azure cloud-based equipment management and reporting software.
- ✓ Helps boost productivity and minimize downtime with always ready, fully functional equipment.
- ✓ Benefit from scheduled on-site service, and emergency on-call assistance. Training and tech support available on-demand.
- ✓ Access to detailed inspection, maintenance, and location records for audits and compliance reporting.
- ✓ Dräger Gas Detection Connect software provides valuable reports for compliance such as instrument bump test reports, calibration certifications, alarm and incident reports and user exposure data. Reports are customizable to meet your needs.

Dräger is a leading innovator of Smart Safety Solutions

For more than 130 years Dräger has been involved in the development and manufacturing of high-quality products designed for hazardous gas detection and personal protection that helps provide optimal safety for industrial workers.

Innovative Gas Detection Technology

We offer a full line of wearable single-gas and multi-gas detectors and area gas detection to meet industrial needs. Rugged and durable, our equipment stands up to harsh conditions. Our gas detection uses Dräger native technology which means our devices integrate seamlessly with our inventory management solutions, and gas detection connect cloud services.

Dräger provides comprehensive sensor solutions in our portfolio of small wearable single & multi-gas monitors and stationary gas detection systems that can monitor your entire facility. Our long term rental programs include sensor replacement at no additional cost.

Cloud Based Gas Detection Platform

Dräger Gas Detection Connect is your connection to the digital future of occupational safety. The system connects individual Dräger products through a smart software solution.

Customers can easily and quickly view information about in-use devices as well as pre-set calibration intervals. The data, certificates, and test results of the gas detector are stored in the cloud backend via the Dräger X-dock® stations and the management and storage of device data, test information, measurement data and other information is handled by the Azure Cloud backend. In addition to the gas detector information, firmware updates can be distributed to the X-dock® stations.

Fleet Management

Dräger Rental Robot

The Rental Robot is a smart solution that operates as an automated issuing machine for worker safety equipment and materials management.

- Custom compartments fit your equipment sizes.
- Control what equipment is accessible and lock away non-compliant materials.
- Helps to maximize accountability and reduce lost or damaged equipment
- Support your team's process with 24/7 access and support from local certified technicians.

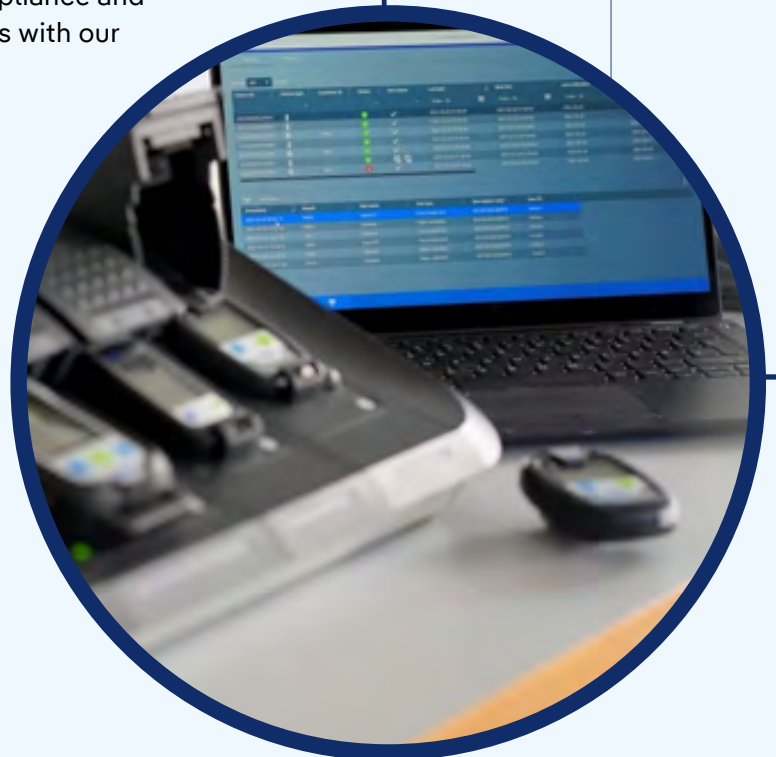

Customized and Compliant

You can count on us to deliver professional and easily accessible services to help keep your operations running in compliance and helps keep your workers safe. Explore the possibilities with our scalable add-on services to help manage your safety equipment fleet.

Dräger Rental Robot with cloud data integration

The latest generation of the Rental Robot integrates the Dräger X-dock® test station into its processes and reports. You decide whether a bump test of the device should take place directly after issue or before it is returned. Integrating the Rental Robot with Dräger's Gas Detection Connect platform, report and notifications can be set to help ensure compliance.

Test results from the X-dock® are synchronized in real time with the Rental Robot - if a test is not passed, the Rental Robot locks the device in the compartment.

Simplifying gas detection with Dräger's Rental Professional program

The Challenge:

One of Louisiana's largest petrochemical plants, manufacturing over 50 chemical products, required a reliable atmospheric monitoring solution to help ensure worker safety and regulatory compliance. The facility was using multiple gas detection devices from various manufacturers to monitor **lower explosive limits (LEL), oxygen (O₂), carbon monoxide (CO), hydrogen, and volatile organic compounds (VOCs)** like benzene and butadiene.

This led to several operational challenges:

- **Loss of efficiency and accuracy** by using multiple vendors
- **Complex equipment management:** Using different device brands created complex calibration and maintenance routines
- **Cross-sensitivity issues** between hydrogen and CO sensors, leading to false readings and worker frustration.

The Solution:

Dräger's Rental Professional

Dräger was able to help streamline the refinery's gas detection program by providing gas detection equipment to match the complex requirements of their 23 production units. By using one manufacturer, we were able to help simplify their maintenance program and provide valuable data insights.

Benefits include:

- ✓ **Fixed-cost pricing** for budget predictability
- ✓ **Comprehensive maintenance and sensor replacement** to help ensure fully functional equipment
- ✓ **On-site training and support**, allowing integrated adoption across 23 production units

Dräger equipped the facility with:

- **X-am® 8000 multi-gas detectors** with specialized sensors to resolve the hydrogen cross-sensitivity issue
- **Infrared LEL sensors** for monitoring inert atmospheres
- **Benzene VOC sensors and pre-tubes** for precise, real-time gas measurement
- **Dräger Rental Robots and X-dock calibration stations** to help streamline maintenance and reduce equipment downtime
- **Gas Detection Connect** software license allows live cloud data transparency.

The Results:

By consolidating their gas detection devices into a **single, standardized solution**, the facility significantly improved **safety, efficiency, and compliance**. The **X-am® 8000's advanced sensor technology** eliminated the hydrogen cross-sensitivity issue, reducing false alarms and ensuring accurate readings.

With the help of **Dräger Rental Professional**, the Louisiana facility overcame long-standing gas detection challenges with a **cost-effective, low-maintenance solution**. By helping to eliminate equipment inconsistencies, streamline maintenance, and provide expert support, Dräger proved to be a trusted safety partner for their operations.

What our customers say

“Dräger’s Rental Professional Services has been a game changer for our facility. It covers all aspects of our gas detection fleet management program. Should any equipment need routine labor or repairs, we can rest assured Dräger will take care of it quickly and effectively.”
