Technology for Life

# Dräger Rental Advanced

Selecting the right gas detection equipment provider is a strategic decision that can have far-reaching impacts on plant safety, compliance, operational efficiency, and costs. Dräger's Rental Advanced and Rental Professional programs can help you achieve all these goals without the administrative burden.

Choose an experienced and trusted partner offering affordable program pricing and an exceptional customer service team available 24/7/365, so you can implement a complete product solution that helps ensure safety at all times.

Recognizing the importance of digital technologies in enhancing industrial plant safety and compliance, and acknowledging the growing need for solutions that simplify and reduce the costs of managing gas detector fleets, Dräger has introduced its latest smart safety solution for gas detection: Dräger Rental Advanced.

Available nationwide, Rental Advanced allows industrial plants to continuously equip their workers with the latest in Dräger portable gas detection technology, with no capital expense and with Dräger assuming responsibility for bump test monitoring, maintenance, and repairs.

## What advantages do you get with a Dräger Rental Advanced program

- ✓ Access to the latest advanced technology and software
- ✓ Smooth fleet management with cloud-based reporting
- ✓ Transparent pricing for budget security
- ✓ Scheduled calibration intervals set to automatically calibrate instruments when using the X-dock® station.
- ✓ Option to include Dräger proactive remote services to monitor equipment status, alert you to any equipment requiring action, and automate equipment exchange.

# Create a customized plan for your gas detection rental needs

---

With Dräger's advanced sensor technology and equipment, you can stay focused on your core business, confident your equipment is in compliance.

## Advanced Technology Equipment

Portable gas detectors and analyzers are essential because they can detect, measure, monitor and react to any gases in the immediate area around them. Dräger offers both single- and multi-gas monitors that reliably detect a wide range of gases. All of our portable gas detectors and software are designed to make compliance and asset management intuitive, so you can implement a complete product solution that helps ensure safety at all times.

## Gas Detection Software

The power of data is enhancing safety measures like never before. Dräger's Gas Detection Connect cloud based reporting and asset management software gives you full access to data from many locations, manages all aspects of bump test reports and auto-calibration and documentation.

## Smart Asset Management and Distribution

The Rental Robot is your streamlined solution for managing safety equipment. This automated issue-and-return station gives registered users round-the-clock access to the tools and supplies they need, where they need them, without the need for staff to be present.

# Dräger Rental Advanced with Gas Detection Connect

Equipment Availability	Included with Dräger Rental Advanced
Access to full product line of portable single and multi gas monitors and area monitoring equipment	<input checked="" type="checkbox"/>
Bump test and calibration station and accessories	<input checked="" type="checkbox"/>
Advanced technology including Dräger X-pid® 9500 for selective, portable PID gas measurement device with lab quality results	<input checked="" type="checkbox"/>
Program Components	
Microsoft Azure hosted cloud-based reporting and asset management. Includes bump test and calibration certificates, incident reports and current as well as historical equipment status	<input checked="" type="checkbox"/>
Fast equipment swap for non-functional equipment, consignment options available for reduced downtime	<input checked="" type="checkbox"/>
Cloud based software monitors Dräger X-dock® station activities, connectivity, and calibration gas cylinder status	<input checked="" type="checkbox"/>
Advanced sensor technology for extended life with sensor replacement included <b>at no extra cost</b>	<input checked="" type="checkbox"/>
Training and Implementation – Full implementation, support and training, plus, certified user training available	<input checked="" type="checkbox"/>

## Dräger's Rental Advanced

Help Keep workers safe and your operations in compliance with a streamlined full-service equipment rental and maintenance program that is flexible and scalable to meet your needs.

### How it works

- Equipment is delivered fully configured to your specifications.
- Portable gas detection instrumentation is configured to auto-calibrate with the Dräger X-dock® bump test and calibration station helping to eliminate down-time for maintenance.
- In the event your device is not properly functioning, a new device will proactively ship within 24-48 hours or you can choose to have consignment stock on hand. Inventory is managed with or without the Dräger Rental Robot smart distribution solution.
- With Dräger's flexible options, keeping consignment inventory for immediate access is easy and affordable, only pay for what you use!

### Training and Implementation

Dräger will support your training and implementation programs with our factory trained technicians. These programs include user software and application training for effective use of all devices, as well as more detailed training for onsite experts on your personnel team.
