

First Responder Safety in Wildfires

Rising Threat of Wildfires

The number of extreme forest fires is continuously increasing due to climate change. The United Nations expect the number to grow by another **50% until 2050**.

Global forest cover loss by wildfires 2001-2022:

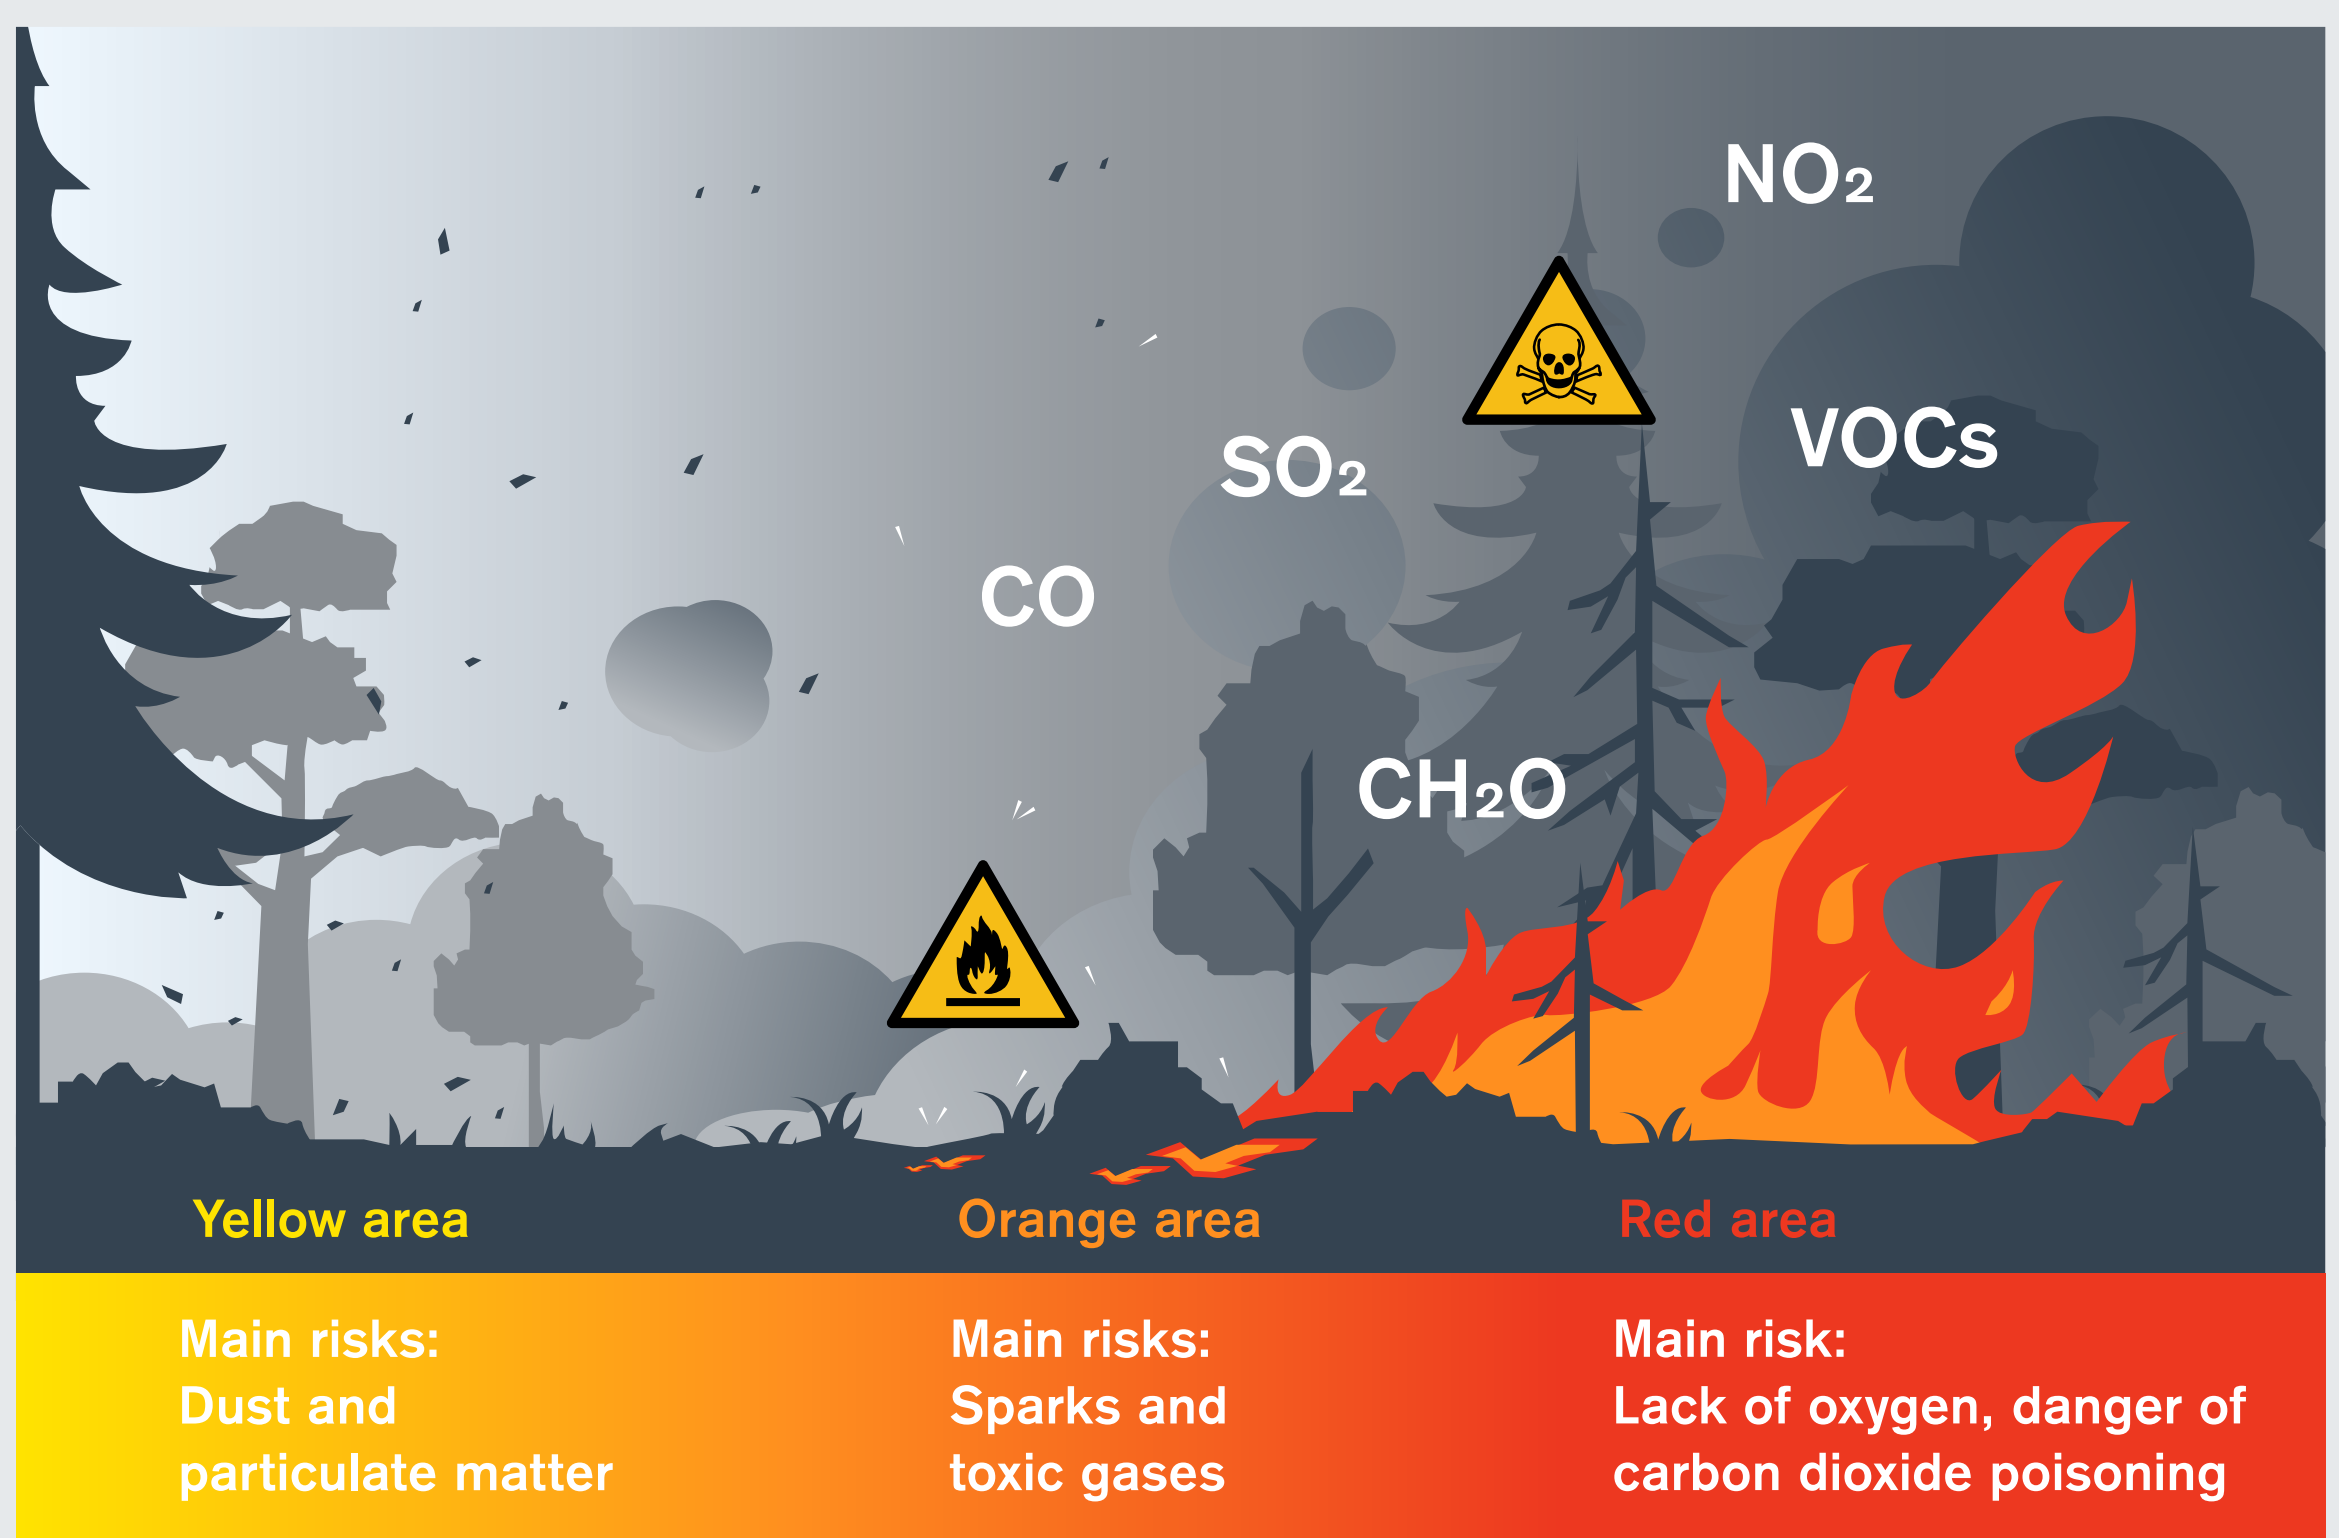

94.8 mio
hectares

Size of Germany:
35.7 mio
hectares

Hazard Areas in Wildfires

Our Solutions for Fighting Wildland Fires:

Breathing protection

X-plore® 1900

X-plore® 3500

X-plore® 5500

PARAT® 5510

PSS® AirBoss

CBS® 1000

Additional protective and training equipment

X-pect® 4200

HPS® 3500

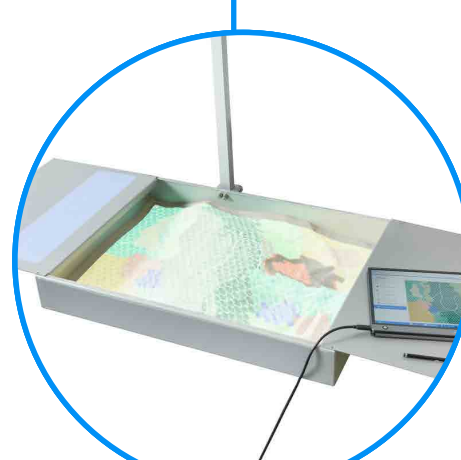

PAC® 6500 CO or
PAC® 8500 CO/O₂

UCF® FireVista

Wildland Fire Simulator
WFS 1000

Disclaimer:

The displayed portfolio provides an overview of possible safety gear. The selection of the applicable protection level is always depended on a risk assessment based on the local situation and SOP's. Be prepared for fast changing conditions or situations.
