

DRÄGER
TRAINING ACADEMY

Dräger Training Academy

Every day, we all play a part in turning technology
into Technology for Life®

Dräger

Technology for Life

TAILORED LEARNING
APPROACH

Knowledge for SUCCESS

Dräger a recognised industry leader in both Medical Devices and Safety Technology brings in addition over 40 years of education & training experience. This allows us to help embed the required knowledge individuals and their organisations need to safely and efficiently support our technology and / or work in hazardous environments.

Increasing efficiency and safety

Through a variety of learning approaches we help to equip individuals with the knowledge and experience they need. Ensuring that learned know-how can be recalled and applied when needed; whether that is to maintain a hospital's medical devices, operate breathing apparatus to support life in testing circumstances, or having the confidence to work in a range of hazardous environments.

Training that delivers

- The use of technology, systems and scenarios that helps accelerate learning and confidence
- A blended mix of learning (e-learning digital, classroom on-site, simulation)
- A comprehensive learning approach which is tailored to your individual learning requirements

Expert knowledge

Internationally experienced trainers provide up-to-date know-how – as much theory as necessary, as much practice as possible.

Customised concepts

Tailored training content, duration and location based on your individual needs.

Blended learning

We combine traditional “classroom” training with practical exercises, realistic simulations and web based online modules.

Consistent quality

A global ‘train the trainer’ approach ensures the same high level of knowledge for employees at any location.

A truly comprehensive approach

Combination of training

Through a variety of learning approaches we help to equip individuals with the knowledge and experience they need. Ensuring that learned know-how can be recalled and applied when needed; whether that is to maintain a hospital’s medical devices, operate breathing apparatus to support life in testing circumstances, or having the confidence to work in a range of hazardous environments.

A truly blended learning approach which is tailored optimally to your respective requirements.

Our team

Dräger’s Technical Training department only employ authorised and accredited trainers who are qualified to at least degree level or have equivalent experience in relevant engineering specialities. They are all registered or are eligible for registration as professional engineers. All have completed or are completing a recognised adult teacher training qualification ranging from C&G 7302, C&G 7307 to PGCE.

„Dräger courses are always delivered at a good pace and appropriate to the group“

„Very informative with lots of additional information from a very experienced tutor“

„All aspects covered very well by the instructor and it was made easy to take it all in “

„Good content perfect pace, good level of detail and an excellent range of further reading material provided“

Why Dräger?

1. Knowledge provider for more than 40 years

For more than 40 years Dräger Academy has been developing knowledge content that supports success in industries and organisations throughout the world.

2. Commitment to quality

Dräger is certified according to the TUV accredited ISO 9001 quality management system amongst others. In addition to complying with various local laws and regulations, selected training courses also meet the high standards set by organisations such as OPITO* and Fit2Fit.**

3. Your global partner

Dräger provides expert assistance and consulting, from conceptual planning of a facility, the implementation of essential technology solutions, to the equipping and training of your operational team to help handle any situation you may encounter.

*OPITO is the global, not-for-profit, skills body for the energy industry.

**Fit2Fit is a scheme to ensure that organisations and individuals are competent to deliver FaceFit testing training.

Training focused on you

Small Groups

It is Dräger's philosophy to ensure that training is focused on you, therefore with this in mind we set course sizes to reflect both the individual and the activity to ensure the best learning experience.

All of our regional courses are led by a team of dedicated technical trainers who are accredited by our Global Academy.

Training Rooms

All our technical and application based training can be conducted either at one of our purpose built training centres, on your premises (where suitable) and also via social and e-learning, when it aids learning. All our courses are led by a team of dedicated technical trainers who are accredited by our Global Academy. Courses utilise both theory and practical elements and incorporate a range of scenarios albeit in a safe and secure environment.
