

Protecting you **every step** of the way

Our solutions for Fire Services

Dräger

Technology for Life

Discover Our Strengths

Committed to protecting you every step of the way.

4

Training

We help you stay prepared—at any time and any mission.

6

Firefighting

Supporting you to save lives and protect property.

8

Hazmat Incidents

Minimise unknown dangers by maximising your personal protection.

10

Technical Rescue

Every rescue is unique, your equipment should be too.

12

Readiness

At the end of your mission, we've only just begun.

14

Usability 

Safety+ 

Our Strengths are Your Advantage

At Dräger, the focus of the design and function of our equipment prioritises four essential strengths: Usability, Safety+, Connectivity and Serviceability. These pillars are the foundation of our commitment to you, your team, and the communities you protect. Discover the improved ergonomic fit and ease-of-use of our product solutions. Designed to a firefighter's unique mission, they enhance your situational awareness during an incident as well as supporting your long-term health through effective and efficient cleaning processes.

Reliable Solutions for Fire Services

You face numerous challenges when responding to emergencies, relying on your expertise, experience, and the quality of your equipment. Because every call brings an unexpected situation, we're committed to ensuring your safety at every turn. Empower your preparedness with our training systems, meet the highest safety standards and address individual requirements with our personal protective equipment. Whether it's for equipment maintenance or state-of-the-art digital solutions, we tailor our workshops, services and solutions to align with your needs.

Connectivity 

Serviceability 

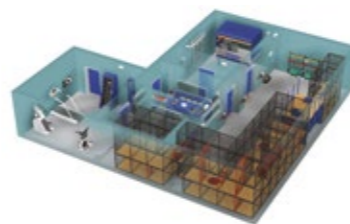

Our Solutions for Training

Our training solutions create real scenarios and support firefighters to gain the skills for the real challenges they face.

ST-2282-2006

Training Gallery (stationary)

Firefighters can train behaviour in confined spaces under real-life conditions in this realistic simulator. Stress-enhancing effects such as smoke, background noises and darkness test one's skills and psychological resilience.

D-274-2023

D-275-2023

Dräger GFC 3000

This gas-fired fire training system provides essential scenarios for indoor firefighting. Optional equipment enables complex exercises in multiple rooms with variable attack routes. A mobile version is available.

D-25591-2020

Dräger FTS 8000

Enables you to carry out real-life scenarios on nozzle training, smoke layer reading, rapid fire expansion, heat exposure and tactical procedures. Highly realistic training using wood, gas and liquid gas-fired sites.

D-84-2023

Dräger CFS 7000

The gas-powered passenger vehicle simulator is an economical solution for realistic training. It covers internal combustion, gas, hybrid, and electric vehicles, allowing effective training scenarios for emergency personnel with varying experience levels.

D-4735-2021

Dräger AFS 5000

Budget-friendly, the AFS 5000 is a gas-powered aircraft fire simulator equipped for diverse scenarios and suited for beginners or advanced students. Compliant with International Civil Aviation Organization requirements.

Training for users and technicians

Our comprehensive courses for product use and application scenarios equip technicians and users with expert knowledge for maintaining technology and working confidently in hazardous environments.

D-7724-2024

D-6687-2022

Our Solutions for Firefighting

Structural firefighting is one of the most demanding operations for firefighters. You need complete reliability and flexibility when it comes to your equipment—to get the job done.

D-5685-2021

Dräger PSS AirBoss Connect
One of the lightest breathing apparatus for firefighting, the PSS AirBoss is available in 3 different monitoring variants, Active, Agile, and Connect. When connected to our Dräger FireGround accountability system, incident commanders receive live data from each SCBA wearer.

D-2467-2022

Dräger FireGround
In all scenarios, the incident commander needs live information from all SCBA wearers at all entry points and know they're accounted for. The Dräger FireGround Accountability System deploys rapidly and minimises the need for voice communication via radio, allowing remote monitoring and supports incident reporting.

D-20750-2020

Dräger BG ProAir
Long duration incidents that require breathing protection are extremely challenging, both physically and mentally. The Dräger BG ProAir closed circuit breathing apparatus provides you with up to four hours of breathing protection during arduous missions.

D-4981-2024

Dräger FPS 7000
Thanks to its enhanced ergonomics and multiple sizes, our full face mask series sets high standards in safety and wearing comfort. It ensures optimal vision and integrates seamlessly into the system, consisting of helmet, mask and breathing apparatus.

D-59569-2012

Dräger HPS 7000
Our multipurpose Dräger HPS 7000 firefighting helmet provides optimum protection. Integrated with a universally and individually adjustable mask connection system, this full-shell helmet gives you an effective combination.

D-1562-2022

Dräger UCF FireCore
Our hands-free thermal imaging camera gives you a permanent vision of your immediate surroundings, even under the toughest conditions. That allows you to orientate yourself more quickly and safely, while also improving your situational awareness.

D-35749-2021

Dräger NANO Cylinder
The Dräger NANO Cylinder (NLL = Non-Limited Life), Type 4, is one of the lightest gas cylinders. Firefighters benefit with a longer duration of air consumption combined with high durability and solid robustness.

D-42486-2015

Dräger PARAT 5550
The fire escape hood is specifically developed for fire rescue teams for use in victim rescue. Securely packaged in a flame-retardant holster, it works together as a system with Dräger breathing apparatus according to EN 137:2006, Type 2.

D-971-2024

Dräger FPS-COM 7000
Talk and listen without touching a button. The FPS-COM 7000 gives you hands-free communication with excellent voice quality. Thanks to the integrated loudspeakers, its team talk function let's you communicate with all team members without any radio equipment.

Our Solutions for Hazmat Incidents

Hazmat operations can take a toll on your senses. Hazards are invisible, tasteless, and odourless, therefore your equipment is a lifeline to safety.

ST-1562-2004

Dräger Tubes

More than 180 Dräger Tubes are helping to identify unknown risks and determine the right level of PPE. You can use in pipeline, gas installations, in sewers, mine shafts and other confined spaces.

D-44307-207

Dräger X-am 8000

Clearance measurement was never this easy and convenient: The 1 to 7 gas detector detects toxic and flammable gases as well as vapours and oxygen all at once – either in pump or diffusion mode. Innovative signalling design and handy assistant functions ensure complete safety throughout the process.

D-1780-2021

Dräger UCF FireVista

Small, light, robust and can be operated with just one button: The compact thermal imaging camera Dräger UCF FireVista provides excellent picture quality even under the most difficult operating conditions and is ready for immediate use.

D-44283-2021

D-1699-2018

Dräger SPC 4900

The SPC 4900 liquid-tight splash suit features permanently integrated gloves and socks and an extra-large hood with visor. The compressed air breathing apparatus is worn underneath the suit, protecting your equipment against contamination.

D-44598-2010

D-18861-2010

Dräger CPS 7900

This gas-tight suit provides excellent protection against industrial chemicals, biological agents and other toxic substances. Its innovative material also qualifies the CPS 7900 for work in potentially explosive areas as well as for handling cryogenic substances.

D-21157-2009

Dräger PAS AirPack 1

The Dräger PAS AirPack 1 unit can be used for tasks of long duration. You can choose between one to four compressed air cylinders and ranging from 6 L to 12 L (200 or 300 bar).

D-51-2022

D-19766-2014

Our Solutions for Technical Rescue

When salvaging a vehicle after an accident, or removing debris from severe weather, self-protection is crucial for rescue personnel.

D-28815-2015

Dräger HPS 3500

For all your diverse requirements, from search and rescue missions to forest fires and wildland firefighting, to traffic accidents and height rescues—this multifunctional and universal helmet suits any kind of technical assistance.

D-0421-2019

Dräger HPS SafeGuard

The multipurpose HPS SafeGuard is one of the lightest helmets in its class and offers you exceptional protection without limiting your movements or perception. Its sporty look, light weight and tailor-made accessories make the helmet a real all-rounder for any challenge.

D-8547-2019

Dräger HPS-COM

The Dräger HPS-COM is a robust, easy-to-install communication unit for firefighting helmets. Thanks to the latest technology, it delivers excellent audio performance. You can choose between two different base units and four microphone options.

D-4987-2017

Dräger PAC 6500

This is your compact, robust and reliable companion under tough conditions. The personal single-gas detection device warns against hazardous concentrations such as carbon monoxide with precision and reliability.

D-46183-2021

Dräger X-plore 1900

The premium dust mask X-plore 1900 offers high wearing comfort, low breathing resistance with a wide breathing space. Three different protection classes are offered: FFP1, FFP2, FFP3. The particle filtering face piece protects against fine dust as well as solid and liquid particles.

D-8337-2017

Dräger Oxylog VE300

The straightforward and user-friendly Dräger Oxylog VE300 is built to face your challenges in preclinical emergency services. With reliable ventilation technology, robustness and intuitive operation, it provides you with dependable and safe assistance in an emergency.

D-36042-2021

D-36026-2021

Our Solutions for Readiness

Professionally cleaned and serviced equipment ensures the safety of the user. We support you with tailor-made services, service equipment or complete workshop solutions for optimised workflows.

D-22940-2020

Harstra Wash6HP

The professional washing machine Harstra Wash6HP is an all-rounder for the cleaning of PPE such as SCBAs, face masks, lung demand valves, and helmets. The Wash6HP is a joint development between Dräger and the Dutch cleaning equipment manufacturer Harstra.

D-11899-2018

Dräger MFC 7000

The Dräger MFC 7000 is a fully automatic cleaning and drying cabin, especially for chemical protection suits. By using different racks, the MFC 7000 is also capable of cleaning and drying SCBAs, face masks and lung demand valves.

D-20441-2020
D-32351-2020

D-32343-2020
D-32345-2020

Detergents

A selection of tested and approved detergents, validated for Dräger PPE equipment, allows for efficient cleaning of contaminated PPE either with manual cleaning or machine cleaning methods without a high impact on the material and function of the PPE.

D-8875-2019
D-5122-2023

Stationary Breathing Air Compressors

The stationary breathing air compressors generate air delivery rates between 150 and 850 l/min. The various models can be optimally adapted to your needs through a large selection of additional equipment options.

D-2438-2024

Dräger Workshop Software

Simply better organised: With its extraordinary degree of flexibility, Dräger Workshop software is the ideal complete solution for workshop management. The innovative, user-friendly software solution provides more transparency, improved processes and increased efficiency.

D-1541-2021

Dräger Quaestor 8000

All static and dynamic tests of the Dräger Quaestor 8000 are carried out fully automatically. This ensures you a high level of efficiency through comfort and speed.
