

# Dräger Original. Each part can make the difference

Dräger supplies over 2,500 accessory items\* to offer a solution for almost every need – from breathing masks to flow sensors to disposable and reusable breathing circuits. We design and develop all our products according to the requirements of our customers. Our original accessories have been tested and approved. Used in combination with the Dräger Atlan family, precise interaction between device and accessory is ensured. By providing complete system solutions, we focus on increasing patient safety and reducing cost of ownership.

We offer a wide range of software and hardware options for Atlan. Please contact your local Dräger sales representative for further information.

\* Not all devices and accessories are available worldwide.

# The art of monitoring.

In today's dynamic healthcare environment, you expect to have solutions that provide both clinical and economic value. Dräger patient monitoring enables greater efficiencies hospital-wide – bringing data to the point-of-care, advancing patient surveillance during transport, and integrating with therapy devices as workstations.

In the OR, workstations integrating Dräger monitoring and anaesthesia systems streamline access to monitoring parameters, anaesthetic agent data, ventilator data and lab results via a standard user interface. Dräger OR workstations support efficient workflow, enhanced ergonomics, and ease of use. Please contact your local Dräger sales representative for further information.
