

ComfortStar® - Anesthesia face masks Consumables and Accessories

During anaesthesia-induced surgical procedures, every breath your patient takes is critical. With its unique teardrop or round-shape design, our ComfortStar® anaesthesia face masks provide a superior anatomical fit and seal performance. Comfortable to wear and easy to use, it is also compatible with all Dräger anaesthesia devices. ComfortStar® supports every patient age to breathe easier.

Benefits

Comfort and flexibility - all in one single use: ComfortStar anaesthesia face masks

The safe delivery of anaesthetics involves having the right equipment that not only keeps your patient secure, but also facilitates the clinician's work. To give you optimal flexibility of use, our ComfortStar masks are designed with an inflatable cushion that gives you a comfortable, steady grip. When choosing ComfortStar mask sizes 4-6, you have the additional feature of built-in ridges in the body of the mask, which provide you with a safe, non-slip grip.

Moreover, the complete visibility of your patient's face during anaesthesia-induced procedures is critical for safe and continuous observation. ComfortStar masks have transparent mask body that allows you to observe every detail of your patient's condition. Similarly, for quick and easy size identification, all masks are pre-equipped with 'Traffic Light' coloured hook rings. Smaller sizes (0-1) are red in colour, medium sizes (2-3) are yellow, and large sizes (4-6) are green. You can also include small and large headgears for a simple and secure fix.

Scented options for more comfort: ComfortStar anaesthesia face masks

A potential side effect for patients who have undergone surgical procedure under general anaesthesia is postoperative nausea and vomiting (PONV). This often delays patient recovery. Research shows that added aromas can help minimise these unpleasant side effects ¹⁾.

To minimise postoperative discomfort, ComfortStar scented anaesthesia face masks have the same excellent benefits and features of the ComfortStar standard masks. They are available in either strawberry or bubble gum scents when choosing sizes 1-4, and mint scent in sizes 3-6. For added optical stimulation, we have also designed our ComfortStar masks with an appropriate colour scheme which is intended to reduce pre-operative anxiety in patients.

¹⁾ Anderson, L.A., Gross, J.B.: Aromatherapy with peppermint, isopropyl alcohol, or placebo is equally effective in relieving postoperative nausea, 2004, in: Journal of PeriAnesthesia Nursing, Vol. 39, No 1, 29-55
