

# Dräger HC-COM

## Headset for Helmets

—

Dräger HC-COM helmet units are compact and lightweight receiver/transmitter units which can be adapted to different helmet shapes and enable immediate, clear and reliable communication.

# Highlights

## Different versions

The receiver/transmitter units of the HC-COM series are available with different options:

- HC-1 COM – equipped with a sensitive bone microphone and one loudspeaker
- HC-2 COM – equipped with a sensitive bone microphone and two loudspeakers
- HC-E COM – equipped with an electret microphone and one loudspeaker

## Simple mounting to different helmet types

The HC-COM units can be adapted to the different helmet types, using different types of adapters. For some types, thanks to the universal bracket, no additional tools are required.

## Universal connector to Dräger Com-Control/PTT units

The HC-COMs can be connected to the different Com-Control/PTT units such as C-C400 or C-C500 via a universal connector and are also adapted to different types of radios in this way.

## Increased personal safety with hands-free communication

The integration into the personal protective equipment enables enhanced personal safety and more efficient working as it enables hand-free communication and full concentration on the current task.

## Reliable and voice-sensitive microphones

The HC-COM units are equipped with very reliable microphones which are also voice-sensitive, enabling their use with a helmet or underneath respiratory protection.

# Connective Products

## Assembly adapter Dräger HPS 6200
