

Dräger FS-5000

System Support

The Dräger FS-5000 is used to simulate the presence of fire or flames to test the correct operation of the Dräger Flame 5000 CCTV Detector.

Highlights

Benefits

The Dräger Flame 5000 CCTV Detector is a 'Visual Flame Detector'; therefore the Dräger FS-5000 has been specifically designed to enable long range testing of this detector.

The Dräger FS-5000 is designed and built for extreme offshore environmental conditions. The electronics are housed in an enclosure which is designed for Zone 1 hazardous areas.

Connective Products

Dräger Flame 1350 (UV/IR)

- Uses UV and IR sensors for reliable detection of hydrocarbon-based fires
- High performance and low false alarm rate

Dräger Flame 1750 H₂ (IR3)

- Specially developed for hydrogen fire detection
- Triple IR sensor, robust and weatherproof
- High performance and low false alarm rate

Dräger Flame 3000

- Uses digital image processing for extended field of view
- Fewer false alarms compared to conventional detectors

Dräger Flame 5000

- Imaging based explosion proof flame detector with a colour CCTV camera
- Digital image processing and advanced algorithms for flame interpretation
- Extended field of view and fewer false alarms
