Clarification Gas Transmitter E//XTR 0*** Certificates PTB 11 ATEX 1005X und IECEx PTB 11.0005X

Dear Mr. Aeverbeck,

With reference to the gas transmitter series ETR/ITR/XTR 0*** (Dräger Polytron 5000 and 8000 series), as well as the junction box variant of type EAC 01** with the approvals PTB 11 ATEX 1005X and IECEx PTB 11.0005X, we confirm the following:

- The ¼-14 NPT blind plug in accordance with ANSI/ASME B1.20.1 assembled by Dräger is certified within the scope of the above-mentioned approvals and types. The plug is shown in the scheduled drawing SE20882. The normative requirements are considered in the IECEx TR's resp. the ATEX Test reports.
- The gas transmitter ETR 0*** mentioned above is approved as a local- and a remote variant. The local variant consists of gas transmitter and a directly mounted EC Sensor (marked with ESH 00**). In the remote version, the EC sensor head (marked with ERH 00**) is installed separately from the transmitter and connected to the transmitter via a remote sensor adapter (marked with ERA 00**).

For any more questions don't hesitate to contact me.

Best regards
By order

Dipl.-Ing. J. Flötotto
