

Dräger accuro Pump for Gas Detection Tubes

—

Fast measurement with one hand: The Dräger-Tube pump accuro allows you to use the established Dräger-Tubes to take measurements under extreme conditions. The easy-to-use Dräger-Tubes have already been calibrated and form a perfect unit with the Dräger-Tube pump.

Benefits

Mobile spot measurement

This manual pump is used for spot measurements such as the detection of concentration peaks, confined space entry, worst-case scenarios etc.

Functional bellows pump

The Dräger-Tube pump accuro draws in 100 ml per stroke. When measuring, the pump body (bellows) is pressed together completely. The exhaust valve is closed during the opening phase of the bellows so that the gas sample flows through the connected Dräger-Tube into the pump. After the complete opening of the pump body into its original position the suction process is finished. The end of stroke is visible by a pressure-controlled end of stroke indication, located in the pump head.

Sampling

During the sampling process the substances to be evaluated are firstly accumulated on a suitable carrier material, e.g. activated charcoal, silica gel and so on. The air to be evaluated is thereby drawn over the respective material - with a predefined flow rate and duration. Afterwards, the substances that have accumulated on the carrier material through adsorption or chemisorption are examined qualitatively and quantitatively in the laboratory using instrumental analysis such as gas chromatography.

One-handed operation

Frequently, measurements need to take place under extreme conditions, e.g. on ladders, in shafts or when wearing heavy breathing protection. The Dräger-Tube pump accuro can easily be operated with one hand and enables a reliable measurement also in difficult-to-access places.

System Components

Dräger-tubes® for short-term measurements

The Draeger short-term detector tubes have proven to be a very costeffective and reliable way to measure toxic gases and vapors in the workplace.

Dräger sampling tubes and systems

High precision guaranteed: The Dräger sampling tubes and systems are very reliable in use even with complex compounds and mixtures of substances.

Accessories

ST-1990-2005

Dräger TO 7000

The Dräger Tube Opener 7000 enables you to open the tips of the Dräger-Tubes, pre-tubes and sampling tubes in an efficient manner, with improved safety and contains the tips of the tubes for responsible disposal.

ST-14319-2008

Dräger accuro extension hoses

For use in hard-to-access locations such as shafts.

Available in the following sizes:

- 1 m
- 3 m
- 10 m
- 15 m

Accessories

Hot air probe

Enables the measurement of extremely hot gases, e.g. in combustion plants (up to 650 °C).

Bar probe 400

Is used for clearance measurements in containers, e.g. intermodal shipping containers.
