

# Meet VHA Directive 1073 with Innovian® Anesthesia V8.0 - Moderate Sedation

Dedicated and automated electronic documentation of Moderate Sedation cases with input from VA Moderate Sedation Nurses

Innovian® Anesthesia V8.0 provides the support to capture data for Moderate Sedation documentation. One of the core enhancements offered in Innovian Anesthesia V8.0 is an optional module specific to Moderate Sedation. With this option, clinicians can quickly navigate and document within a module specifically designed to meet Moderate Sedation needs. Anesthesia management can then easily review any potential untoward events and meet JCAHO requirements.

As with General Anesthesia documentation in previous Innovian Anesthesia versions, the Moderate Sedation care area module offers functionality for admissions, charting, patient assessments and scoring, record summary, and vertical toolbar functionality. So, whether you are in Pre-Op, Operating Room, Recovery, or Discharge, Innovian Anesthesia V8.0 simplifies your Moderate Sedation charting needs.

#### **Customized specifically for Moderate Sedation nurses**

- Visibility to pre-procedure assessments
- Vital sign entry and assessments throughout admission to discharge
- VA-PAS & other scoring
- Recovery, transfers, and discharge

#### **Quick charting via a customized toolbar**

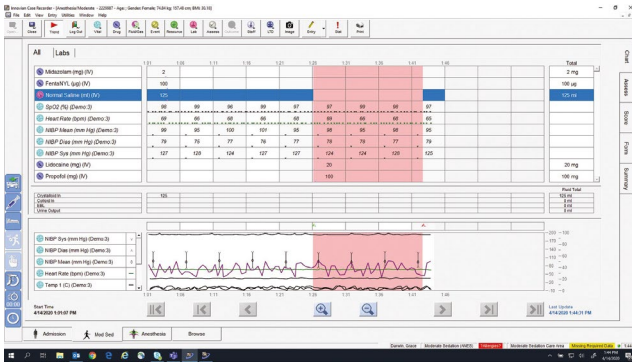

- Patient arrival/discharge
- Case start/stop
- Medication administration
- Timers & reminders

#### **Rolling forms with automated and manual entry options**

- Pre-procedure
- Exams
- Status
- Recovery
- Discharge

#### **Summary record**

- Meets legal and billing requirements required for Moderate Sedation
