# New vital signs monitor Vista 120 SC

Keeping an eye on patient health with less amount of work

- Spot check for selective vital signs measurement, daily ward rounds and continuous monitoring of vital functions – all in one handy device
- Data exchange with electronic medical record (EMR) or hospital information systems (HIS) instead of tedious typing

**Lübeck** – Simplifying care without compromising patient well-being – the Vista 120 SC brings hospitals a big step closer to achieving this goal. Via HL(Health Level)7 interface entire patient lists can be loaded onto the monitor. The patients are identified by a barcode scanner and vital data, such as SpO<sub>2</sub>, pulse, blood pressure or temperature, is collected and automatically transferred back to the electronic documentation. Selectable, integrated scoring systems such as EWS<sup>1</sup>, NEWS<sup>1</sup> or MEWS<sup>1</sup> also help to better identify gradual deterioration in health. The Vista 120 SC is operated via four buttons, a rotary knob and an 8-inch touchscreen. The device can be used for adults, children and even premature babies. For mobile use, the device is equipped with WLAN and a rechargeable battery that allows up to six hours of mobile operation.

The Vista 120 SC is manufactured by Shanghai Draeger Medical Instrument Co, Ltd.

### **Dräger. Technology for Life®**

Dräger is an international leader in the fields of medical and safety technology. Our products protect, support and save lives. Founded in 1889, Dräger generated revenues of around EUR 2.8 billion in 2019. The Dräger Group is currently present in more than 190 countries and has more than 14,500 employees worldwide.
