Optimal fit for virtually any face

X-plore 1900 - new particle filtering face pieces

- Best possible fit thanks to two sizes
- High wearing comfort and easy handling
- Compatible with protective eyewear

Lübeck – The new Dräger X-plore 1900 is a high-performance, single-use dust mask for protection against fine dust and particles. It is available in two sizes, combining ease of use, exceptional comfort and optimal fit.

The Coolsafe filter material combines high filtration efficiency with low breathing resistance, allowing the user to work easily and without tiring for long periods of time. It is available in the three EN protection classes, which are easily recognizable through their color coding (FFP1 = yellow, FFP2 = orange, FFP3 = red).

Optimal fit, ease of use

The dust mask is available in two sizes (S and M/L). This makes it suitable for many different face shapes and sizes, so each wearer can choose the right size for an optimal fit. The three-part folding design offers high flexibility in terms of fit, so the mask easily adjusts to the wearer's face. Even when the wearer speaks, the mask does not shift.

The elastic and endless textile Varioflex head straps make it very easy to put on the Dräger X-plore 1900. Thanks to its sturdy shape, it is easy to don, comfortable to wear and seals firmly without pressure.

Exceptional comfort

Thanks to the latest high-performance filtering materials, breathing resistance is hardly noticeable when using the X-plore 1900. The optional models fitted with a Coolmax exhalation valve reduce breathing resistance even further and prevent the accumulation of warmth and moisture inside the mask. This provides relief for the user, especially during strenuous physical activities, and keeps breathing comfortable.

Page 2 / 2

The Smartfold design with patented double reinforcement makes the mask shape highly stable and provides a generous breathing space. Additionally, exhaled air is directed downwards, reducing the perceived temperature inside the mask.

Great vision with glasses

During the product development process, Dräger paid particular attention to ensuring that respiratory protection is also fully compatible with protective eyewear. Thanks to the special design, spectacle wearers can also wear the Dräger X-plore 1900 comfortably, without the mask or glasses getting in each other's way and without the spectacles fogging up.

The X-plore 1900 is manufactured by Dräger Safety AG & Co. KGaA

Dräger. Technology for Life®

Dräger is an international leader in the fields of medical and safety technology. Our products protect, support and save lives.
