

## Gas Consumption Analytics

### Data-Driven Solutions

Reduce the consumption of volatile anesthetics with Gas Consumption Analytics. The application helps you to derive clinical and economical insights from the agent consumption of your anesthesia devices and creates transparency on consumption uptake, efficiency, cost and applied fresh gas flows.

#### ANESTHETIC AGENT CONSUMPTION

Visualizes the consumption and related costs per anesthetic agent used in a department.

#### EFFICIENCY

Indication of the average fresh gas flow as well as anesthetic gas consumption and patient uptake ratio.

#### FINANCIAL TRANSPARENCY

Average costs per minute and intervention function as economic performance indicators.

#### APPLIED FRESH GAS FLOWS

Creates transparency on applied flow rates and provides a foundation for the implementation of low- and minimal-flow practices.
