Gloves (alkali-resistant)

Full contact: Glove material: nitrile rubber, glove thickness: 0.11 mm, Breakthrough time:> 480 min

The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the resultant standard EN374.

This recommendation applies only to the product stated in the safety that comes from us and the purpose specified by us. When dissolving in or mixing with other substances and under different conditions of the EN 374, you need to contact the supplier of CE-approved gloves (eg KCL GmbH, D-36124 Eichenzell, Internet: www.kcl.de)

Body protection:

Light protective clothing.

Respiratory protection

Suitable respiratory protection apparatus:

Particle-filtering half mask, filter P2

In case of dust formation wear micro dust mask.

The operator has to ensure that maintenance, cleaning and testing of respiratory protective devices are carried out according to the instructions of the manufacturer and documented accordingly.

Environmental exposure controls

Technical measures to prevent exposure

Not be released into drains.

Additional information

Methods for measurement of the workplace atmosphere must correspond to the requirements of DIN EN 482 and DIN EN 689.

Technical measures and appropriate working operations have priority over the use of personal protective equipment.
