

## Gas-Vision Software History

| Version no. | Instrument  | Bug Fixes  | Features  |
|-------------|-------------|--|---|
| 5.0         | General     |  | Long file names are supported now   |
|             | General     |  | XP compatible   |
|             | MultiPID 1  |  | No more support of MultiPID 1   |
|             | General     |  | Directory to save files can be permanently adjusted                         |
|             | General     |  | Facelift of interface   |
|             | General     |  | Pac Ex 2, X-am 3000 (limited), X-am 7000 now supported                      |
| 5.6         | Pac III     | bugfix of Pac III datalogger   |   |
|             | X-am 3000   |  | improved readout of X-am 3000 (faster)                                      |
| 5.6.5       | General     | Bugfix regarding the logging of sensors  | Improved online measurement   |
| 5.6.8       | General     | Bugfix regarding print out of charts, as no correct date and time was printed          | Also the TWA-value between the two cursors will be printed on the print out |
|             | Pac III     | All events will be printed in the chart, e.g. also the TWA-value at the end            |   |
| 5.6.13      | X-am 3000   | Bugfix regarding date and time setting at online-measurement                           | Support of Firmware 1.4   |
|             | General     |  | Min/Max/Average/TWA output in printout diagramm                             |
| 5.7.5       | Pac 7000    |  | Integration of Pac 7000   |
|             | X-am 7000   |  | Integration of X-am 7000 with PID-Sensor                                    |
|             | X-am 2000   |  | Integration of X-am 2000  |
| 5.8.0       | Pac 7000    | Bugfix regarding download of the datalogger Pac 7000                                   |   |
|             | General     |  | Identification of DLL releases in Info-Box                                  |
| 5.8.2       | Multi PID 2 |  | Integration of Multi PID 2 (Plus)   |
| 5.8.4       | Pac 7000    | Bugfix regarding download of the datalogger Pac 7000                                   |   |
|             | X-am 5000   |  | Integration of X-am 5000  |
| 5.8.8       | General     | Single sessions selectable with datalogger larger than 100 sessions.                   |   |
|             | Pac 7000    |  | Support of Pac 7000 V2.2  |
| 5.8.9       | X-am 5000   | New X-am 5000 DLL integrated (V3.0.016): bugfix if datalogger is full and in roll mode |   |

| Version no.                    | Instrument  | Bug Fixes  | Features   |
|--------------------------------|-------------|--|--|
|                                | General     |  | COM-Ports >8 available                                 |
|                                | X-am 5000   |  | New X-am 5000 DLL integrated (V3.0.016)                |
| 5.9.2                          | X-am 5600   |  | New X-am 5000 DLL (V3.0.019) with X-am 5600 integrated |
|                                | General     |  | Support of Windows 7 (32 bit)                          |
| 5.9.4                          | General     |  | Support of Windows 7 (64 bit)                          |
| 5.9.7                          | General     |  | Support of Cat-Ex 125 PR                               |
| 5.9.8                          | General     |  | Improvement of multi-session selection                 |
| 6.0.2<br>Release<br>16.01.2013 | X-dock      |  | Support of X-dock data loggers                         |
|                                | X-am 125    |  | Support of X-am 2500                                   |
| 6.0.4<br>11.02.2013            | X-dock      | Fix for Pac data loggers read by X-dock                                    |  |
| 7.0.0<br>15.11.2014            | General     |  | Design Facelift (icons, colors, layout...)             |
|                                |             |  | Excel-Export   |
|                                |             |  | Automatic USB detection                                |
|                                |             |  | Introduction of key based license concept              |
|                                |             |  | Improved session handling (sidebar)                    |
|                                |             |  | Improved chart navigation                              |
|                                |             |  | Improved print process                                 |
|                                |             | Long Session Handling  |  |
| 7.0.1<br>12.05.2015            | Pac Series  | Fix in data logger DLL for Pac instruments. Date and time are now correct. |  |
| 7.2<br>29.11.2017              | X-am 8000   |  | Support of X-am 8000                                   |
| 7.2.2<br>05.03.2018            | Pac 6X/8X00 |  | Support of Pac 6X/8X00                                 |
| 7.2.3<br>22.06.2018            | XDM         | Bug fixed during data transfer of data logs                                | Support of X-am 3500                                   |
| 7.2.8<br>10.07.2019            | General     |  | performance improved for online-measurements           |
|                                | General     |  | column width fixes                                     |
|                                | General     |  | TWA calculation with own graph added                   |
|                                | General     |  | STEL calculation with own graph added                  |
|                                | X-am 8000   |  | Data handling improvements and language files updated  |
|                                | All devices |  | DLLs updated   |

| Version no.         | Instrument      | Bug Fixes | Features   |
|---------------------|-----------------|-----------|--|
| 7.3.2<br>19.05.2020 | X-pid 9000/9500 |           | Integration of X-pid 9000/9500 measuring datas in Gas Vision |
|                     | Polytron 7000   |           | Removing of uploading datalogger from Polytron 7000          |
|                     | General         |           | Improvement of excel-export                                  |
| 7.3.7<br>23.06.2020 | X-pid 9000/9500 |           | Bug Fix: open files for X-pid                                |
|                     | General         |           | Bug Fix: excel-export  |
| 7.3.9<br>01.11.2021 | General         |           | added new datalogger   |
|                     | General         |           | new functionalities on graphic                               |
