

## Drying cabinets Cleaning, Desinfecting and Drying

Short drying times, easy loading: Dräger drying cabinets for respiratory masks and respiratory protection components are functional and economic.

## Benefits

---

### **Stainless steel housing**

Dräger drying cabinets are noted by their high quality materials and workmanship. Their inner and outer housing is made from chrome nickel steel with an insulated drying chamber.

---

### **Desktop equipment**

The desktop model of the drying cabinet has 2, 4 or 6 baskets to accept 12, 24 or 36 respiratory masks or rebreather components. A drip tray to collect the residual liquid is included as standard.

---

### **Low maintenance**

The drying cabinets are extremely robust and low in maintenance.

---

### **Short drying times**

The heating features a powerful radial fan and thus provides short drying times.

---

### **Free-standing equipment**

The drying cabinet versions MTS 8 and 10 are free-standing models with 8 or 10 baskets to accept 72 or 90 respiratory masks or rebreather components. Due to the large basket the masks can be placed upright in the baskets.
