Gemina®DUO
Medical Supply Units

Whether you are equipping an emergency room, an intensive care unit, an intermediate care unit or a recovery room, the Dräger Gemina®DUO wall-mounted supply column system lets you choose from a wide range of configurations and options, helping to create a workspace for efficient, patient-centred care.

- Cable management
- Electrical sockets
- 38 mm pole with 150 kg max. load
- Choice of different RAL colours
- Gas terminal units
Benefits

Versatile, ergonomic and cost-effective

The Dräger GeminaDUO provides enhanced ergonomics and versatile functionality in an intelligent, compact design. It gives you space for up to 30 media terminals for power, gases and data in the single-sided version and up to 56 terminals in the dual-sided model. Various lighting options let your patients read, rest and recover in comfort, while providing high-quality light sources for examination and allowing caregivers to safely navigate around the room at night. Built for easy cleaning with rounded edges and seamless faceplates, the GeminaDUO helps prevent dust accumulation, improving hygiene as well as patient and caregiver safety.

Many applications, one solution

Depending on your particular challenge, the GeminaDUO can be installed in a number of different configurations. Here are just a few examples:

The basic system for emergency rooms
A single Dräger GeminaDUO supply unit serves one bed. All connections and components are within easy reach and out of the patient’s view. Caregivers have unhindered access to the patient’s head. An optional lighting package is available for the column. The basic system makes maximum use of available space and helps to streamline caregiver workflow.

The intermediate system for recovery rooms and intermediate care
A single, central Dräger GeminaDUO supply unit serves two beds, giving you maximum cost-efficiency while continuing to maintain high ergonomic and workflow standards.

The advanced system for intensive and neonatal care
Two Dräger GeminaDUO supply units serve one central bed. This allows you to separate wet and dry equipment for added safety, improved comfort and enhanced hygiene. This configuration can provide support for up to 16 infusion pumps for maximum-care situations.

Options to suit your needs

The Dräger GeminaDUO is available with a number of options and accessories that let you tailor the supply unit to suit your needs and fit your budget.

The freedom of choice
With Dräger ColorLine, the choice is yours. You can assemble your own pallet of RAL colours to match the design and feel of your care area, or choose one of several set combinations, painstakingly selected by our team of color experts using the latest scientific research. By combining our classical, natural, Mediterranean and children’s colours with corresponding room tones, Dräger design specialists can help you create the atmosphere you need to make your patients feel comfortable.

Lighting options
Various light options are available: the comfort and safety of patients and staff is ensured by indirect light and a night light, dimmable or switchable, in efficient LED technology.
System Components

**Dräger Advanced Workplace Design**

Our solutions offer real, round-the-clock improvement for your clinical routine and focus on places where performance demands on your team are highest.

**Dräger Mounting System**

Appealing in design, the flexible Dräger Mounting System provides ergonomic positioning in emergency rooms, operating theatres, intensive care units and other medical environments. Ideal for use with flat screen displays, it can also be used with other medical equipment.

**Noise Display SoundEar®**

Monitor and display background noise levels on your ward to support a comfortable, healthy and healing environment for patients, staff and visitors.1
Accessories

**Wire baskets**
The wire baskets are used for storage of disposable catheters or disposables gloves. The catheters can be simply stored in bundles and are then easy to take out one by one.

Related Products

**Linea®**
Combine flexibility and economics with a complete line of custom bedhead units that give you electrical, gas and IT supply solutions, and even illumination options for a variety of general and specialised applications.

**Ponta® Beam Supply System**
Featuring a wide range of beam lengths, column types and workstation options to choose from, the versatile Dräger Ponta® gives you the ability to supply and position medical equipment and devices for enhanced workspace efficiency.
