Specially designed for demanding tasks, The Dräger PSS® BG 4 plus closed-circuit breathing apparatus combines uncompromising safety with outstanding respiratory protection and wearer comfort. Innovative in design, it provides the wearer with up to four hours of breathing gas in toxic environments.

Breathing hose
Ideal balance and freedom of movement due to positioning of the hose over the shoulders

Reflective stripes
Clear visibility, even in dark environments

Robust housing
Fiber reinforced housing protects you and your equipment

“Pull-Forward” waist belt and adjustable shoulder straps
Easy donning in confined spaces as well as high quality ergonomics
Dräger PSS® BG 4 plus

- **Exhalation Hose**: Sentinel II, fully electronic signal and warning unit for monitoring a multitude of viral breathing apparatus functions.
- **Spring Clip CO₂-Absorber**: Improved spring clip for better durability.
- **CO₂-Absorber**: Absorbs carbon dioxide from the exhaled gas.
- **Breathing Bag**: Responsible for the high pressure in the unit.
- **Breathing Bag Springs**: Responsible for the high pressure in the unit.
- **Drain collecting**: Optional super-absorbent fleece as a practical single-use component for collecting liquid.
- **Pressure Relief Valve**: Opens automatically if the breathing bag is full, non-regenerated breathing gas exits the circuit.
- **Full Face Mask Dräger FPS 7000 RP**: Constant Metering, enriches the breathing air with at least 1.7 l/min oxygen.
- **Cooler**: Can be filled with ice.
- **Switch-Box (Low Pressure Sensor)**
- **Minimum Valve**: Improved resistance against corrosion due to special coating.
- **Clip for Minimum Valve**
- **Pressure Reducer**
- **Oxygen Cylinder**: 2 L, 200 bar.
Benefits

Dräger PSS BG 4 plus

Whenever emergency teams are saving lives or extinguishing fires, above or below the ground, the Dräger PSS BG 4 plus comes into its own. Whether used during rescue or fire fighting missions in mines, tunnels or underground train ducts, or in assignments with long access routes, the closed-circuit breathing apparatus is the first choice. More than 25,000 professional users rely on the Dräger PSS BG 4 worldwide.

Optimized in conjunction with our customers

Our products must meet the precise needs of the user and, for this reason, we involve our customers in the development process. Modifications to the proven Dräger PSS BG 4 are the result of practical experience and constant monitoring to ensure the highest quality standards. We listened to our customers and implemented their requirements in the new Dräger PSS BG 4 plus. Numerous improvements and new accessories have increased safety and durability and further improved the ease of servicing. The modifications are available individually or a as a practical retrofit set upon request.

Excellent suitability for extended use

The slight positive pressure breathing circuit protects the wearer by preventing hazardous substances from entering the sealed breathing system. Depending on the application, the duration of use is up to four hours. A CO\(_2\) absorber removes carbon dioxide from the exhaled gas. At the same time the breathing gas is enriched with oxygen from the oxygen cylinder. Before the regenerated breathing gas is inhaled again it flows through the cooler.

Product enhancements

Both the minimum valve, which enriches the breathing gas with additional oxygen upon demand, and its attachment clip have been treated with a special coating to protect against corrosion. A redesigned clip simplifies the fitting of the valve. The area around the pressure reducer has been reinforced and additional reinforcement protects the carrying plate, providing greater stability when handling the unit complete with oxygen cylinder. To reduce the temperature of the inhaled gas and minimize physical stress to the wearer, the cooler can be filled with ice.

Practice-oriented innovations

Newly developed heat protection for the breathing hose and housing are also optionally available to further reduce the temperature of the inhaled gas. A T-piece with water trap can be retrofitted to the facemask to prevent water from collecting in the flow area of the device. Any liquid discharged into the breathing circuit from the drain valve is optionally collected in a super absorbent fleece. The fleece is designed for single use and is easily disposed.
Benefits

Simple CO₂ disposal

Complete with integral dust filter, the flow-sensitive CO₂ absorber is available as either a single-use absorber or refillable cartridge. Fitted with a newly designed spring clip, the CO₂ absorber offers increased spring durability. The position and size of the breathing hose connectors have also been optimized for easier handling during assembly. For hygienic storage the single-use absorbers are available in a sealed bag.

Proven wearer comfort

The ergonomically shaped carrying plate, the low weight and the proven harness with adjustable shoulder straps and easy to use “pull-forward” design provide more freedom of movement with less effort. The practical breathing hose routing across the shoulders ensures optimum balance on the wearer’s back.

All functions upon a glance

The Dräger PSS BG 4 plus is equipped with the Dräger Sentinel II fully electronic signal and warning unit. Controlled via large push buttons, it combines a multitude of functions. During use it quickly provides the wearer with important information, thereby reducing the risk potential. Using battery warning thresholds the Dräger Sentinel II reliably indicates current operational status.

Monitoring functions:

- Cylinder pressure (analog and digital)
- Remaining duration of use (time remaining until residual pressure warning)
- Temperature indication upon the press of a button
- Automatic recording of all mission data optical and acoustic warning signals:

Optical and acoustic warning signals:

- Residual pressure warning
- Two additional selectable electronic alarm thresholds
- Automatic alarm for lack of movement
- Manual emergency call alarm

High performance soda lime

Drägersorb 400 has been specially designed for the absorption of CO₂ in closed-circuit breathing apparatus which significantly contributes to long-term performance capabilities, especially under the likely conditions of use for the Dräger PSS BG 4 plus. Drägersorb 400 is characterized by a very high abrasion resistance and can, therefore, be used in the apparatus for 6 months, or up to 300 miles when stored in a vehicle.
Benefits

**Easy maintenance**

Both the retrofittable vibration protection and the robustly designed locking hinge increase the safety of the Dräger PSS BG 4 plus during transportation. For maximum operational readiness, the Dräger PSS BG 4 plus has been designed to allow the fast assembly and/or removal of device components without special tools.

**The full-face mask Dräger FPS 7000 RP**

The full-face mask Dräger FPS 7000 ideally complements the Dräger Panorama Nova product family. With an improved head harness and available in various sizes, it adjusts perfectly to every face shape. With its dual sealing line, the almost natural field of view and easy-to-operate wiper, the FPS 7000 RP ensures a safe tight fit and good all-around visibility. An optional adapter enables the connection of the comfortable CamelBak* drinking system. Liquid only flows through the straw when the integrated biting valve is pressed together by the teeth.

*CamelBak® is a trademark of Camelbak Products, LLC.

Drägersorb®

Drägersorb® 400 is a soda lime product used to absorb acid gases, such as carbon dioxide (CO$_2$), in closed or semi-closed circuit breathing apparatus, such as the Draeger PSS BG 4 plus, for mining or fire rescue operations. High-tech devices and state of the art absorbents are perfectly matched with the Drägersorb® 400.

Dräger Service

With Dräger’s service solutions, you get complete peace of mind and budget security knowing that your safety equipment is supported by the same team of experts that engineered it and is backed by over 125 years of experience. You can rely on Dräger to keep the devices you depend on operating at peak performance and to always put the safety of your team first. That’s the Dräger Service Advantage.
